

OUR VISION & STRATEGIES AT A GLANCE

UNFPA in Ethiopia aims to achieve the following:

- 1. Reduced maternal deaths and unplanned pregnancies** and increased access to clinical care for rape survivors through the delivery of the Minimum Initial Service Package for Sexual and Reproductive Health in emergencies (MISP); successful transitions from minimum to comprehensive SRH services, and to more resilient health systems in Ethiopia.
- 2. Reduced rates of GBV**, through prevention actions aimed at sustainably transforming discriminatory gender norms; mitigation of GBV risk through improved security, dignity, and mobility of women and girls and across all sectors of humanitarian response; and mitigation of life-threatening impact and long-term recovery promotion through better quality services by meeting the GBV Minimum Standards in Emergencies.
- 3. Increased resilience in high-risk locations** of the country through reduced humanitarian needs, speedier recovery and more robust local delivery systems that serve women and girls as well as young people and contribute to sustainable development objectives.
- 4. Reduced levels of inter-communal violence, rebuilt social cohesion** based on increased trust, confidence and positive interaction between conflict-impacted regions among young people.

UNFPA GEOGRAPHIC COVERAGE

★ OUR MAIN ACHIEVEMENTS

1. GENDER-BASED VIOLENCE PREVENTION AND RESPONSE

199,477

Women and girls reached with multi-sectoral GBV services across 8 affected regions

99,612
